

8- CHEMISTRY

HOME-ASSIGNMENT

1. State the postulates of the Kinetic Molecular Theory
2. How does heat affect the motion of molecules.
3. Define matter. Briefly describe the three states of matter with examples.
4. What is the scientific name of particles which make up matter?
5. What do you understand by the kinetic energy of molecules?
6. Explain how intermolecular force and intermolecular space decide the states of matter of a substance.
7. Why are solids incompressible?
