VideoAssignment – 2

[**Note:** Students, since the assignments are related to the video, let us call them video assignments. It will be easier for all of us to identify the assignments. These questions are based on the second video, hence we shall call it video assignment-2. Thank you.]

Q1. Write a program to accept the length and breadth of a rectangle from the user and display its area and perimeter.

Q2. Write a program to accept the radius of a circle from the user and display its area and circumference.

Q3. What are the two factors that influence the creation of variables in a program?

Q4. How do we provide inputs to the member methods of a class?
