

Assignment

Chapter: 2 Class: 3 Subject: Computer

Q.1) What is Operating system?

Ans: An Operating system is a system software that manages all the jobs of a computer and makes it run. Without an Operating system a computer cannot work on its own. Example: Windows, Linux, Mac etc. *(Ref: Page No. 18)*

Q.2) What is Windows? *(Page No.28, Qu. No.1)*

Ans: Windows is an Operating system developed by Microsoft, world's leading software company. It provides a Graphical User Interface that makes the interaction between the computer and the user easy. *(Ref: Page No. 19)*

Q.3) Define Interface. Name the main types of Interface. *(Page No.29, Qu.No.7)*

Ans: The commands or menus, through which a user communicates with an external device or a program, are called User Interface or Interface. There are two main types of interface:

- i) Command Line Interface (CLI)
- II) Graphical User Interface (GUI)
