Assignment-7
Class-4 (Science)
Ch-2 Teeth

(Continue your work in the copy after question-5)

Ques 6- What type of food are good for our teeth?

Ans 6- Food rich in calcium like milk, milk products, green leafy vegetables, carrots, apples and citrus fruits like oranges, lemons etc. are good for our teeth.

Ques 7- What are the causes of dental cavities?

Ans 7- Dental cavities are caused if we do not take proper care of our teeth. Tiny bits of food that get stuck between our teeth lead to the growth of bacteria. Bacteria releases acid which destroys the enamel of the tooth that results in cavities or tooth decay.

G-Think and answer:

Q1- Why do we have different kinds of teeth?

Ans-We have different kinds of teeth because they are of different sizes and shapes and have different functions.

Q2- Why should we avoid eating too much sweets and chocolates?

Ans- We should avoid eating too much sweets and chocolates because they contain high amount of sugar that destroys the enamel as the bacteria turns sugar into acids that causes cavities.

Do B,C,D,E and F in your book itself (refer the answers given below)

B- Tick the correct option:

1.(b)20 teeth
2.(a)incisors
3.(b)enamel
4.(c)enamel
5.(c)four

C- Fill in the blanks:

1.20
2. Wisdom
3. Molars
4. Two
5. Calcium

D- Write True or false:

1.False
2.False
3.False
4.True
5.False

E- Match the columns:

1.Milk teeth_ 20 in number
2.Permanent teeth- 32 in number
3.Incisors- cutting teeth
4.Canines- tearing teeth

5.Molars- grinding teeth

F- Label the picture (refer page 11)
