

Chapter – 9

Water as a Resource

Answer the following questions:

Q1. Why is evaporation of water bodies during daytime faster as compared to night-time?

Ans: The evaporation of water bodies during daytime is faster as compared to night-time because the temperature during daytime is higher than the temperature at night.

Q2. Give one difference between evaporation and Condensation.

Ans: Evaporation: The changing of liquid state into gaseous state with the increase in temperature.

eg: water changes into water-vapour.

Condensation: The changing of gaseous state into liquid state with the decrease in temperature.

eg: water-vapour changes into water.

Q3: Name the sources of water.

Ans: Rain is the main source of water. The other sources are Oceans, Rivers, lakes , ponds and underground water.

Q4 : Name the different forms in which water exists on Earth.

Ans: Water exists on Earth in three different forms:

Ice - solid form

Water - liquid form

Steam - gaseous form.

(On the plane side - Draw the sources of Water.)

Do it in the text book : Page No. 73

Fill in the blanks:

1. Evaporation
2. Faster
3. Condensation
4. Groundwater
