

Ch- 6

The four Domains of the Earth

(Continue the work in your notebook)

Q3- What do you mean by Hydrosphere? What is the importance of Hydrosphere?

Ans- All the water bodies on the earth's surface namely oceans, seas, lakes, rivers together with snow and ice are collectively called the hydrosphere.

The importance of hydrosphere is-

- . It provides abundant water vapour to the atmosphere which results in rains.
- . It helps in maritime activities and promotes trade.
- . It provides an abundant source of food for mankind.
