

## Assignment

### Science

### Class 3

### Chapter 4

### Animals: Common Insects

#### Answer these questions (To be continued in the science copy)

**5. Name any two harmful insects. Mention how they harm us.**

**Ans-** Two harmful insects are mosquitoes and houseflies. They sit on dirt and garbage and carry harmful germs. When they sit on our food, they contaminate it. When we eat that food, we fall sick.

**6. Name the products we get from honeybee.**

**Ans-** The products we get from honeybee are honey and bee wax.

**7. Give any five remedies to protect yourselves from harmful insects.**

**Ans-**

- Rub an icepack on the affected area of the insect bite to get relief.
- Use an anti-allergy medicine to get relief from itching, swelling, and redness.
- Use a Calamine lotion over the affected area.
- A paste of baking soda can be applied on the affected part of bee sting.
- Use aloe vera gel on the affected area to get relief.

**8. What should be applied to get relief from a bee sting?**

**Ans-** A paste of baking soda should be applied on the affected part to get relief from a bee sting.

**G. Think and answer.**

**1. Why do insects fly a short distance?**

**Ans-** Insects fly a short distance because they have very small wings.

**2. Why are houseflies harmful to us?**

**Ans-** Houseflies are harmful to us because they sit on dirt and garbage and carry harmful germs. They sit on our food and spread the germs which make us sick.
