

COMPUTERS
CLASS FIVE
Chapter 2
Types of Software

Mr. Jaideep Chowdhury

Write these Q & A in your copy

Q5. What is the use of Scanning Utility ?

Ans. The act of examining the computer system, drives or files for possible virus or other malware is called scanning. Scanning is performed by antivirus utility.

Q6. State the difference between System software and Application software.

Ans. < Copy from the video of Tue 12/05/20 >

Q7. What is the use of Backup Utility software ?

Ans. Sometimes a storage device, like a hard disk, may fail. This will lead to loss of data. A smart user will keep copies ,of important files of the hard disk , in other storage devices like CDs and pen drives. These copies are called backups. The utility programs that enable the regular backing up of data are called Backup Utility software.
