

Assignment

Class-4 (Science)

Ch-3 (continued)

(Continue your work in your notebook)

Ques 6- Where in the urinary system do the following processes take ?

i. Urine formation- **Kidneys**

ii. Transport of urine away from kidneys- **Ureter**

iii. Temporary storage of urine- **Urinary Bladder**

Ques. Draw (on the left plain page) a diagram of human Excretory system and label the following parts- Kidney, Ureters, Urinary bladder and Urethra.

G-Think and answer-

Ques 1. Why do we taste starchy foods like bread and rice sweet after we chew them?

Ans. We taste starchy foods like bread and rice sweet after we chew them because the saliva converts starch present in these foods into sugar.

Ques 2. Why does our body need to excrete?

Ans. Our body needs to excrete because it is necessary to get rid of waste materials and help us stay healthy.

(Do F in your book itself)
