

ASSIGNMENT(physics)

CLASS- VI

1. Define the followings:

a) Length b) MASS c) Temperature d) Area

2. Mark the statement as true or false:

i) Kilometre unit is used to measure long distances.

ii) SI unit of time is hour.

iii) Laboratory thermometer is used to measure temperature of human body as well as in science laboratory.

iv) Conversion of Fahrenheit into degree Celsius is given by $C = (F - 32/9) \times 5$

v) 1 Second = $1/86400^{\text{th}}$ part of mean solar day.

3. CHOOSE THE ODD ONE OUT.

a) Metre , kilometre , centimetre , kilogram.

b) Gram , kilogram , millimetre , quintal.

c) Length , ruler , thermometer , degree Celsius , beam balance.

d) Second , minute , stop clock , screw guage.
