

# MATHS ASSIGNMENT.

## CLASS-2

### CHAPTER: DIVISION (REVISION)

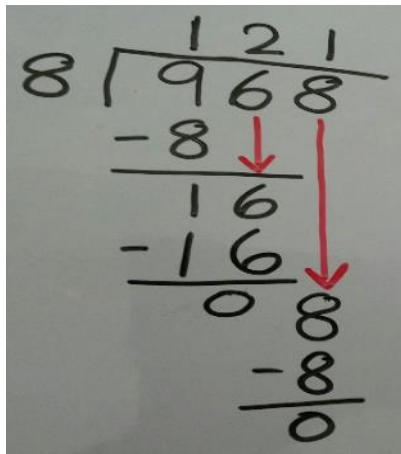

---

**Solve the following word problems.**

**Example:** 968 apples are packed equally in 8 boxes. How many apples are there in each box?.

No. of apples in 8 boxes = 968.

Total no. of apples in 1 box =  $968 \div 8 = 121$

Handwritten long division of 968 by 8:

$$\begin{array}{r} 121 \\ 8 \overline{) 968} \\ \underline{-8} \phantom{00} \\ 16 \phantom{0} \\ \underline{-16} \phantom{0} \\ 08 \\ \underline{-8} \\ 0 \end{array}$$

Red arrows indicate the steps: from 9 to 12, from 12 to 121, and from 121 to 121.

**Therefore, 121 apples are there in each box.**

---

Q1. 680 candles are packed equally in 10 packets. How many candles are there in each packet?

Q2. 495 students are there in school. There are 5 classes. How many students are there in each class?

Q3. A shopkeeper sold 90 books in 6 days. How many books did he sell in 1 day?
