

ASSIGNMENT
SCIENCE
CLASS-4

Chapter-6
Plants in the surroundings
and environment

(Mark the answers of D in your book itself)

D. Write true or false:

1. True
2. True
3. False
4. True
5. True

(Do E and G in the notebook...Continue the work)

E. Draw the following:(on the plain side)

1. A taproot and a fibrous root. (refer page 44)
- A leaf and label its parts. (refer page 45)

G. Think and answer:

Ques 1. Most of water absorbed by the plants is lost by the process of transpiration. Is transpiration important for plants?

Ans- Yes, transpiration is important for plants. It produces cooling effects and keeps the plant cool.

Ques2- The leaves of a plant kept in dark do not produce starch. Why?

Ans- The leaves of a plant kept in dark do not produce starch because they did not get sunlight for photosynthesis.
