Ch- 4
Adaptation in animals

A. Answer these questions

1. What is adaptation?

Ans. Animals have some features that help them to live and survive in their surroundings. These features are called adaptations.

2. What are amphibians? Give any two examples.

Ans. Animals that can live both on land and in water are called amphibians. Two examples are- frogs, toads.

3. How is a camel adapted to live in a desert? Write any two adaptations in a camel.

Ans. The two adaptations that help a camel to live in deserts are _

- . It has thick skin to protect it from hot sun.
- . The padded feet of a camel help it to walk comfortably on the soft sand.

(On the plain sheet (left side) **Draw the following:** (both in the same page)

1. any one terrestrial animal
2. the ship of the desert (camel)
