MATHS ASSIGNMENT

CLASS II

WORD PROBLEMS

Solve the following word problems.

1.Ex- Each packet has 96 chocolates. How many chocolates will 7 such packets carry ?

		Statement		T	O
				4	
No. of Chocolates a packet has = 96					
No. of Chocolates in 7 packets = 96 x 7				9	6
Therefore, there are 672 Chocolates in				X	7
7 such packets.				6 7	2

2.Ex-   A man sells 203 tickets every day. How many tickets does he sell in 8 days ?

	Statement	H	T	O
			2	
No. of tickets a man sold every				
day = 203		2	0	3
No. of tickets he sold in 8			X	8
days = 203 X 8		1 6	2	4

Therefore, he sold 1624 tickets in 8 days.

Q1. Do work sheet number 3

word problems 1 to 5 in your maths work book.
