

**Ammonia [Part 1]**

***Write down the important points discussed in the video in your Chemistry Notebook.***

1. Draw the electron-dot diagram of Ammonia molecule.
  2. Answer the following with reference to the lab preparation of Ammonia.
    - i. Write the balanced chemical equation for the preparation of Ammonia.
    - ii. Name the drying agent used. Why can't the other drying agents be used?
    - iii. How is the gas collected? Why can't it be collected over water?
    - iv. Ammonium Nitrate is not used in the preparation. Give Reason.
-
